

The logo for Seranit, featuring the word "seranit" in a bold, lowercase sans-serif font. The letter "a" is replaced by a dark diamond shape with a white dot in the center, resembling a stylized eye or a gemstone. The background of the entire page is a high-resolution image of a modern bathroom interior, showing a shower area with white marble tiles and a glass shower door. The lighting is soft and even, highlighting the texture and veining of the marble.

seranit

FROST RESISTANCE

Slip Resistance

DIN 51130 SLIPPING STANDARD

VALUE

SLIPING ANGLE

Porcelain tiles have different slip resistance depending their surfaces. The usage area of tiles are related to their slip resistance values. This values are rated between 9 and 13, also indicated by R rating. The selection of tiles are subject to type of area and its slip resistance requirement.

R₉

6° <= Angle <= 10°

R₁₀

10° <= Angle <= 19°

R₁₁

19° <= Angle <= 27°

R₁₂

27° <= Angle <= 35°

R₁₃

35° <= Angle <= Higher

Color Shade Variation Guide

V₁

UNIFORM

The least amount of shade and texture variation within each box.

V₂

SLIGHT

Moderate shade and texture variation within each box.

V₃

HIGH

High shade and texture variation within each box.

V₄

RANDOM

Very high shade and texture variation within each box.

PRODUCT TECHNICAL CHARACTERISTICS

	Color resistance to light		DIN 51094	Not any noticeable color change	

NOTES

Seranit recommends a joint of min. 3 mm for optimal installation results.

The test results refer only to first choice items and they do not regard the trimtiles.
The values are based on average production values.

Seranit granit seramik reserve the right to modify technical and formal details included in this catalog.

CERTIFICATES

Environmental Product Declaration, EPD

The Seranit Group holds EPD certificates for all its ceramic product groups, including porcelain tiles, wall tiles and floor tiles. In the process of the EPD certification, the Seranit Group reviews and transparently declares all environmental impacts from the processing of raw materials in its production and applications. With EPD certified ceramic products, the Seranit Group enables its customers to receive high scores during the certification process of their green building projects. Thanks to its EPD certificates, the Seranit Group offers implementers and investors the most accurate environmental information accessible on the respective building materials through scalable and comparable results.

Life Cycle Assessment, LCA

The Seranit Group, which completed LCA and EPD certification processes in order to get additional points for its building products at LEED, aims to bring advantages to its customers during certification procedures. In addition to presenting its customers with benefits in the world's rapidly developing green building markets, the Seranit Group also aims to comply with the laws of the European Union and the requirements of the export market. The Seranit Group has also prepared the infrastructure for eco-design and eco-innovation opportunities through its LCA approach.

Climate Declarations

The Seranit Group carried out a comprehensive carbon footprint project in order to increase awareness in regards to the greenhouse gas emissions of all its products and operations, and to meet its responsibilities in global warming and environmental issues through strategic precautions.

ECO Platform

The Seranit Group enables the use of EPD certificates and declarations both in Europe and at the international level with its ECO Platform membership.
